

Christina Büsing (Aachen University)

Short Biography

Professor for Combinatorial Optimization in the computer science department and the mathematical department at RWTH Aachen University.

Research interests: combinatorial optimization, integer linear programming, robust optimization, efficient algorithms, complexity, network optimization, and optimization in health care.

Papers published in Mathematical Programming, Transportation Science, Discrete applied Mathematics

Head of the Center „Algorithmics and Optimization” at the RWTH, head of the learning lab „Computational and Mathematical Modeling Program” for high school students

Christina Büsing

Aachen University
