

Juan José Salazar González (Universidad de La Laguna)

Short Biography

Professor of Operational Research at Universidad de La Laguna (Spain).

Research area: discrete optimization, including graph theory and integer programming problems and with a particular emphasis on vehicle routing, location and network design problems.

Published over 120 research papers, most in journals like Networks, Mathematical Programming, Operations Research, Transportation Science, Transportation Research B, EJOR, Omega,...

Sits on the editorial boards of Networks, Omega, Computers & Operations Research, Top, Infor.

Vice President 3 for EURO (the association of European OR societies).

Research focus on modeling and solving challenging combinatorial optimization problems motivated by applications in logistics, location, confidentiality, scheduling.
